

## EVENT REPORT 2022-23

### Study Abroad Fair:

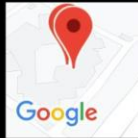

CDC and Kartavya organized an offline Study Abroad Fair in the college seminar hall on September 27<sup>th</sup>, 2022. This event featured a distinguished panel of six prestigious universities from around the globe. This event provided students with a unique opportunity to explore international study options, gain information about the options they have after completing their graduation. Along with them, we were also honored with the presence of an official from the GMAC, Upashana Borpuzari, Marketing Manager, South Asia to share information about the exams students have to give for securing admission in foreign universities. As international exposure is a significant factor in academic as well as personal growth, the Study abroad session was an essential session for the empowerment of students with choices and opportunities beyond the borders.
